

Although the development exceeded my original budget expectations by a modest amount, the actual cost of the project was still significantly below estimates from alternative developers who I considered prior to engaging PBN. Not only the software, but also the business systems necessary to start the company were completed in less than one year. Early sales of the software indicate a high level of customer satisfaction and a high probability of business success.

I recommend the services of Private Business Networks, and expect that they will give you an accurate appraisal of needs, services and expected results and, if engaged, will deliver quality work. Both PBN and Don Winchell have proven to be reliable, competent, and honest in all of our business dealings.

If I can be of further assistance, please call me at 540 665-8322.

Very truly yours,

Bill Brandt
